Closing Down Sale 2011

Billabong Boy | by Arron Wood

At eight years old, Arron Wood jumped into the billabong near his Mildura home and emerged covered in a toxic, blue-green algae that seared his eyes and left a rash all over his body. It was a pivotal moment for Arron, the beginning of a life committed to preserving the environment that he now shares in his new autobiography, *Billabong Boy*. Arron's inspiring career as an environmentalist and educator has earned him awards including the 2001 Young Australian of the Year (National Environment Winner) and the 2006 United Nations Individual Award for Outstanding Services to the Environment. His expertise in environmental preservation has seen him sought after by political parties, green groups and corporations while his charm and charisma has seen him make regular appearances on radio and TV to discuss environmental issues.

Price: \$22.00

Desert Channels: The impulse to conserve

Desert Channels is a book that combines art, science and history to explore the 'impulse to conserve' in the distinctive Desert Channels country of south-western Queensland. The region is the source of Australia's major inland-flowing desert rivers. Some of Australia's most interesting new conservation initiatives are in this region, including partnerships between private landholders, non-government conservation organisations that buy and manage land (including Bush Heritage Australia and the Australian Wildlife Conservancy) and community-based natural resource management groups such as Desert Channels Queensland.

Price: \$33.00

Managing Horses on Small Properties | By Jane Myers

This book shows how to combine sustainable land management practices with a style of horse keeping that will protect the health and well-being of your horses, as well as the land and its wildlife. It will deliver real benefits to the landholder, including, reduced horse keeping costs, better welfare of horses, increased productivity, and improved land management practices.

Price: \$36.00

Love, Mary - Protecting the flow of Queensland's Mary River | by Save the Mary River Coordinating Group

This wonderfully presented collection of stories, science and images about the Mary River and surrounding environments is a fun and informative publication for all ages.

Learn about the issues affecting the Mary River and help support the local groups who are working to restore and preserve it.

Price: \$8.00

All prices include GST. Limited stock available.

Tracks, Scats and other traces. A field guide to Australian Mammals | by Barbara Triggs

Mammals inhabit every corner of our vast continent, yet the great majority of species are seldom seen. The only clue to their presence might be a footprint left on a muddy track, a scat deposited on a rocky ledge, or bones scattered on a forest floor. In *Tracks, Scats and Other Traces*, Barbara Triggs provides all information needed to identify mammals anywhere in Australia, using only the tracks or other signs they leave behind.

Price: \$32.00

Mangroves to Mountains: A field Guide to the Native Plants of South East Queensland | by Glenn Leiper, Jan Glazebrook, Dennis Cox & Kerry Rathie

South-east Queensland contains almost a third of Australia's plant species. From the windswept dunes and headlands and tidal mangroves, to the eucalypt forest, and the cloud-enveloped peaks of Main Range, our native plants are specially adapted to survive and prosper in their preferred habitats. This full colour guide invites readers to explore and discover hundreds of the region's outstanding plants. This combined and revised edition of *Mangroves to Mountains* contains over 2,200 species, that's over two-thirds of the region's native plants.

Price: \$40.00

A field guide to the reptiles of Queensland | by Steve Wilson

A Field Guide to Reptiles of Queensland features 433 reptiles, the full complement of reptiles in Queensland. It includes dragons, geckos, legless lizards, skinks, goannas, snakes, crocodiles and freshwater and marine turtles. There are keys at both the genus and species levels, information on treatment for snake bites, a brief discussion on Queensland's biogeography, its reptiles and reasons why so many are endemic to this one State. Author Steve Wilson is a remarkable wildlife photographer and all 433 species are shown here.

Price: \$26.00

A Green Future: Sustainable Grazing in Australia (DVD)

A Green Future was launched at the 2007 Queensland Landcare Conference by the Morinish Landcare group and major sponsor Waratah/Onesteel. By using a series of factual case studies of grazing families throughout Queensland, *A Green Future* documents the exciting journey of people who have improved their natural resource base by utilising innovation, instinct, and Landcare principles.

This DVD is a great introduction to the development of sustainable grazing systems.

Price: \$11.00

The Slater Field Guide to Australian Birds | by Peter Slater, Pat Slater and Raoul Slater

This guide is designed for use in the field, to slip easily into the pocket, backpack or glovebox. It describes and illustrates all of the approximate 775 species recorded to date in Australia and the 167 painted plates enable easy comparison between similar species.

Price: \$25.00

All prices include GST. Limited stock available.

Discovery Guide to Outback Queensland

The *Discovery Guide to Outback Queensland* sets a new benchmark in travel books, making it an invaluable resource for any tourist and a must-have for exploring the far west of the State. The *Discovery Guide* highlights more than 55 towns and settlements in an area stretching from Camooweal, Mount Isa and Hughenden, south to the New South Wales border and from just east of the Matilda Highway to the Northern Territory and South Australian borders. It includes traditional guide book information on facilities, special attractions and annual events, but also utilises the expertise of Queensland Museum staff in providing an overview of the geology, climate, landscape, environment and human history of Outback Queensland.

Price: \$23.00

A field guide to the frogs of Australia | by Martyn Robinson

A Field Guide to Frogs of Australia will help you identify all the frogs hopping and croaking their way around New South Wales, Victoria, Tasmania, southern South Australia and southern Queensland. A key, with drawings of distinguishing features, plus a colour photograph and distribution map of each frog, will help you to identify your species.

Price: \$19.00

A field guide to the mammals of Australia 3rd Edition | by Peter Menkhorst

This fully revised and updated edition of A Field Guide to the Mammals of Australia is the only comprehensive guide to identifying all 379 species of mammals known in Australia. This book provides concise and accurate details of the appearance, diagnostic features, distribution, habitat, and key behavioural characteristics of all mammals known to have occurred in Australia or its waters since the time of European settlement. Each double-page spread provides all the information needed to identify an animal, a full-colour illustration of the entire animal, a smaller diagram of diagnostic features, a distribution map, and species description and measurements, including details of how to differentiate between similar species.

Price: \$31.00

Closing Down Sale

Carbon Grazing: The Missing Link | by Alan Lauder

After more than 35 years of experience Alan Lauder is offering solutions to these following questions. How does carbon enter and leave the landscape? What is the role of carbon? What issues are currently not associated with carbon that should be? How do animals, plants and the soil all interact within the carbon cycle. Carbon management has always been important, but with climate change, it is going to be even more important. It is increased carbon that provides the landscape with increased resilience. This series of papers outline some of the changes climate change will bring, to allow us to appreciate what we have to adapt to.

Pocket 'Wild Guides' | five titles available

Ants of Brisbane | In Brisbane, more than 350 species of ants probably call the city home. Wherever you see ants, pull out this intriguing little guide and you will be able to put names to at least some of city's more common species.

Freshwater Fishes of the Greater Brisbane Region | The rivers, dams and streams of the Greater Brisbane Region are home to some 50 species of native fish, belonging to 25 different families. This small booklet, which describes 27 species found in the Greater Brisbane Region, is an essential guide for hobbyists and environmental groups.

Raptors of Southern Queensland | Field guides for raptors usually focus on plumage and colour, but this innovative booklet also emphasises the shape and form of the birds while perched or in flight. The text describes all 24 species of raptors endemic to Australia and is enhanced by more than 100 beautiful images.

Snakes of South-east Queensland | Snakes are an important, though often misunderstood, part of our environment. Once maligned, snakes are becoming increasingly appreciated. This 'pocket Wild Guide' by the Queensland Museum documents 56 species and aims to enhance community understanding of snakes as an essential part of Australia's fauna.

Spiders of the Greater Brisbane Region | From a spider's viewpoint, the Greater Brisbane Region is an ideal place to live. Each of the region's very different habitats – from mangroves and sandy foreshores to dry woodlands and high rainforest – supports a diverse and wonderful complement of spider species. This guide highlights the many spiders encountered in homes, gardens and bushland in the Greater Brisbane Region and includes 108 colour photos.

Price: \$8.00

Rainforest Climbing Plants: A field guide to their identification | by Gwen Harden, Bill McDonald and John Williams

A field guide to the identification of climbing plants in rainforest Victoria, New South Wales and subtropical Queensland using vegetative features. This book is the successor to *Rainforest Climbing Plants* (Williams & Harden, 1980, with later reprintings and additions), which was known by many as the 'Green Book'. The book has been completely rewritten, while keeping the essentials of the format of *Rainforest Trees and Shrubs* (Williams, Harden & McDonald 2006) using features of leaves and, in this case, climbing mechanisms. Illustrated keys to groups and individual species are provided. Species are subgrouped within groups with species that have similar climbing mechanisms and leaf characteristics.

Price: \$28.00

Snakes of Western Queensland: a field guide | by Angus Emmott and Steve G Wilson

This is an easy to use reference book for travellers, naturalists and locals alike. Technically correct and simply presented, it is a great way for people to get acquainted with the snakes of the region.

It is an excellent addition to the glove-box, bookshelf or library and includes over 100 vibrant, coloured photographs. All profits from the sale of this publication go to the Channel Landcare Group.

Price: \$16.00

All prices include GST. Limited stock available.

Landholder Guide to Sustainable Forest Management on Freehold Land

Many landholders find it difficult to come to an understanding of what constitutes a lawful pursuit in relation to sustainable forest management practices on freehold land. This guide is intended to inform landholders of the legal requirements, possible threats to future harvest rights and ways to reduce these threats.

Price: \$6.00

Sustainable Native Forest Management: case studies in managing private native forest in southeast Queensland | Sean Ryan & David Taylor

This book is a compilation of case studies which discuss management processes, techniques and outcomes of forest management demonstration sites established between 1999 and 2003. It is a guide for private native forestry managers in the Burnett-Mary catchments who are reviewing management goals for their land and want to improve the long-term productivity of their forests and develop efficient, sustainable practices.

Price: \$16.50

Native Forest Management Workshop Series

This publication covers all the aspects of the education program currently being delivered by Private Forestry Southern Queensland. The program is based on a series of 5 interactive workshops aimed at improving landholders' knowledge and the ability to develop and introduce sustainable forest management practices on their land. Topics covered include: ecological values, legislative constraints, species identification, stocking rates, harvesting to ensure ongoing production, maintaining biodiversity and a range of management techniques and strategies.

Go Wild...

Wildlife of Tropical North Queensland

Tropical North Queensland is one of the world's most beautiful natural areas. Each year, thousands of visitors, from across Australia and overseas, are drawn to the region to experience for themselves the lure of its spectacular landscapes and astonishing wildlife. This full colour identification guide covers the area east of the Great Dividing Range between Cooktown and Mackay (including Cairns and Townsville), and is the first comprehensive publication on the animals of Tropical North Queensland. It comprises easy-to-read information on more than 850 species and 950 colour photographs.

Price: \$23.00

Wildlife of Greater Brisbane

Few urban areas in the world can boast the rich diversity of animal life which is the natural heritage of the Greater Brisbane Region. This full colour identification guide is a comprehensive introduction to more than 600 of the animals with which we share our diminishing wilderness, sprawling urban environs and even the intimacy of our homes. Snails, spiders, insects, other vertebrates, fish, frogs, snakes and lizards, mammals and more than 100 birds are included in easy-to-read entries which describe the physical appearance of each animal and where it is most likely to be found. From worms to whales, the wildlife of the Greater Brisbane region is literally on your doorstep - this book will help you enjoy it.

Price: \$23.00

Wild Plants of Greater Brisbane

The people of Brisbane and its surrounding region live in one of the greenest urban environments in the world. About 2,800 species of wild plants survive, and mostly flourish, in backyards, city parks and remaining bushland. Wild Plants of Greater Brisbane features more than 500 species of the most familiar wild plants, and a few that are less well known. This handy guide includes more than 1,100 colour photographs; along with brief, easy-to-read, descriptions of the plants and their habitats.
